PROFESSIONAL SUMMARY

Enterprise DevOps and Cloud Solution Architect with 10+ years of experience designing, implementing, and optimizing IaaS/PaaS solutions across AWS, Azure, GCP, VMware, and hybrid cloud environments. Proven expertise in AIOps, Generative AI (GenAI), Retrieval-Augmented Generation (RAG), and MLOps pipeline design, integrating AI-driven automation and LLM-based workflows into enterprise DevOps platforms. Skilled in Kubernetes, CI/CD pipelines (Jenkins, CircleCI, GitHub Actions, Azure DevOps, ArgoCD), Infrastructure as Code (Terraform, Ansible, Bicep, Pulumi), and DevSecOps practices. Experienced in FinOps cost optimization, SRE, chaos engineering, platform engineering, and GitOps. Collaborates with enterprise architects and product owners to align DevOps strategy with business objectives while mentoring global delivery teams and driving Centers of Excellence (CoEs).

CORE COMPETENCIES & KEYWORDS

- Cloud & Infrastructure:** AWS | Azure | GCP | VMware VCF | Nutanix | VMC on AWS | HCX | IaaS | PaaS | Hybrid Cloud | Cloud Migration
- AI/ML & Automation:** AIOps | Generative AI (GenAI) | Retrieval-Augmented Generation (RAG) | MLOps | LLM Integration | AI-Driven Automation | Prompt Engineering | Vector Databases | LangChain
- DevOps & CI/CD:** Jenkins | GitHub Actions | Azure DevOps | ArgoCD | CircleCI | Bitbucket Pipelines | GitOps | Platform Engineering | DevSecOps
- Containers & Orchestration:** Kubernetes | Docker | OpenShift | Helm | Google Anthos | EKS | AKS | Microservices | Service Mesh
- IaC & Configuration Management:** Terraform | Ansible | ARM Templates | Bicep | Pulumi | HashiCorp Vault
- Observability & Monitoring:** Prometheus | Grafana | ELK Stack | Splunk | AppDynamics | Datadog | Azure Monitor | AWS CloudWatch | SRE | Chaos Engineering
- Security & Compliance:** IAM | RBAC | HashiCorp Vault | AWS GuardDuty | Azure Security Center | Compliance-as-Code | Secrets Management

EXPERIENCE

Group Technical Manager (Enterprise DevOps Architect)

HCL Technologies Ltd, India, Mumbai

May 2025 - Now

- Lead design and delivery of enterprise-scale DevOps, cloud-native, and AI-augmented platforms for Fortune 500 clients across multi-cloud environments (Azure, AWS, GCP, VMware).
- Architect and implement AIOps solutions, integrating AI-driven monitoring, anomaly detection, and predictive alerting using Prometheus, Grafana, and ML-based observability pipelines.
- Drive Generative AI (GenAI) and Retrieval-Augmented Generation (RAG) adoption for internal tooling and self-service developer platforms, enabling LLM-powered chatbots and documentation assistants.
- Design MLOps pipelines for model deployment, versioning, and monitoring, integrating with CI/CD workflows using Azure DevOps, GitHub Actions, and ArgoCD.
- Architect end-to-end CI/CD automation pipelines using Azure DevOps, Jenkins, GitHub Actions, ArgoCD, and Bitbucket Pipelines; migrated enterprise CI/CD ecosystems from Jenkins to Bitbucket, improving productivity and governance.
- Re-architect legacy monolithic applications into microservices using Kubernetes, Docker, OpenShift, and cloud-native services; implement Helm-based deployments and GitOps workflows.
- Embed DevSecOps practices into pipelines via automated security testing, compliance-as-code, and secrets management using HashiCorp Vault.
- Develop frameworks for automated provisioning, self-service platforms, and FinOps cost optimization to reduce cloud spend and operational overhead.
- Design observability platforms using Prometheus, Grafana, ELK, and Splunk; champion SRE practices, error budgets, and chaos engineering.
- Build and mentor high-performing global delivery teams; establish Centers of Excellence (CoEs) for DevOps, Cloud, and AI-driven automation.
- Partner with enterprise architects, product owners, and business stakeholders to align DevOps and AI strategy with organizational goals.

Senior DevOps Architect

Persistent Systems Ltd, India, Mumbai

July 2024 - May 2025

- Designed and optimized IaaS/PaaS solutions on AWS, Azure, and VMware using EC2, S3, RDS, Azure VMs, App Services, and AKS to improve scalability and cost efficiency.
- Integrated AIOps principles into observability platforms using Prometheus, Grafana, ELK, Azure Monitor, AWS CloudWatch, and Datadog for predictive issue resolution.
- Automated deployment, scaling, and management of containerized applications with Kubernetes, Docker, Helm, and OpenShift, ensuring high availability and fault tolerance.

- Date of birth: 17 January 1990
- Place of birth: Ratnagiri
- Nationality: India

- Delivered end-to-end CI/CD automation using Jenkins, CircleCI, GitHub Actions, Azure DevOps, and ArgoCD, accelerating release velocity and improving code quality.
- Managed VMware vSphere, VCF, Nutanix, and Google Anthos; enabled hybrid cloud migrations with HCX and optimized resource utilization.
- Implemented IAM, RBAC, Azure Security Center, AWS GuardDuty, network security controls, and encryption to enforce compliance and safeguard data.
- Applied FinOps practices using AWS Cost Explorer, Azure Cost Management, GCP Billing, and Spot Instances to reduce cloud spend.
- Designed backup and disaster recovery strategies with Veeam, AWS Backup, Azure Site Recovery, and Google Cloud DR.
- Led workshops on Kubernetes, Terraform, ARM, Ansible, Pulumi, and cloud security; mentored teams and drove innovation culture.

Senior Cloud Architect

ATOS Global IT Solutions and Services Private Limited, Spain, Barcelona
December 2021 - July 2024

- Designed IaaS and PaaS architectures on Azure (VMs, AKS, App Services, Functions) and AWS (EC2, S3, RDS, Lambda, Fargate, API Gateway).
- Implemented CI/CD automation with Azure DevOps, AKS, Bicep, ARM templates, and Terraform for efficient IaC and resource provisioning.
- Streamlined CI/CD workflows using Jenkins, ArgoCD, vRealize Orchestrator, and Code Stream; automated builds via GitHub and Bitbucket.
- Managed hybrid cloud migrations (VMware Cloud on AWS) using Terraform and HCX; conducted cloud adoption upskilling workshops.
- Automated build, test, and deployment workflows in Jenkins with Groovy scripts for advanced integrations and improved DevOps efficiency.
- Championed DevOps, IaC, and automation-first culture by building CI/CD pipelines with Jenkins, GitHub Actions, and Azure DevOps.

Cloud Ops Architect

Accenture Solutions Ltd, Singapore, Singapore
May 2021 - December 2021

- Led design, implementation, and maintenance of IaaS and PaaS cloud infrastructure across diverse industries ensuring scalable, cost-efficient delivery.
- Architected cloud operations frameworks leveraging monitoring, automation, and incident management best practices.

Cloud Architect

Wipro Technologists Ltd, Dubai, Dubai
September 2019 - May 2021

- Designed and implemented scalable, secure cloud-based solutions for clients across multiple industries.
- Led multi-cloud migration projects from concept to production; delivered IaaS and PaaS architectures on AWS and Azure.
- Earned Wipro Star of the Year Award for outstanding delivery performance and innovation.

Senior Vmware Administrator

Wystek Systems Ltd, India, Mumbai

January 2017 - September 2019

- Managed and maintained enterprise virtual infrastructure using VMware vSphere, ensuring high availability, performance, and reliability.

Vmware Administrator

CMS IT Services Ld, India, Mumbai

April 2015 - December 2016

- Administered VMware environments; performed capacity planning, patching, and troubleshooting for enterprise virtualization stack.

Wintel Administrator

HCL Infosystems Ltd, India, Mumbai

July 2013 - February 2015

- Managed Windows server infrastructure and provided L2/L3 support for enterprise IT environments.

Remote Support Engineer

Capgemini Ltd, India, Mumbai

January 2012 - April 2013

- Provided remote technical support and troubleshooting for enterprise clients across Windows and network environments.

EDUCATION

Masters of Computer Science, Deccan College Postgraduate and Research Institute, India, Mumbai

2011 - 2013

The curriculum of an MSc Computer Science program typically covers a wide range of topics in computer science, including algorithms, data structures, computer architecture, operating systems, software engineering, artificial intelligence, machine learning, cybersecurity, databases, and more.

Bachelor of Computer Science, Lords Universal College Of Science, India, Mumbai

2008 - 2011

Bachelor of Computer Science with expertise in software engineering, data structures, algorithms, and computer architecture. Proficient in programming languages such as Python, Java, and C++, with hands-on experience in software development methodologies and best practices. Skilled in problem-solving and logical reasoning, with a strong foundation in mathematics and computational theory. Passionate about leveraging technology to innovate and solve complex challenges in the field of computer science.

COURSES

Microsoft Azure 900 and 104 Associate Certified, Microsoft

2019

Vmware VCP Certified, Vmware

2018

AWS Practioner Certified, AWS

2021

VMware Cloud Foundation - 9.0 Architect, VMware

2025

Harness Certified Continuous Delivery & GitOps Developer, Harness INC

2025
