PROFESSIONAL SUMMARY

AI Platform Lead and Enterprise Architect with 14+ years of experience designing enterprise cloud, platform engineering, DevOps and AI infrastructure across AWS, Azure, GCP and VMware.

Currently focused on **GenAI, LLMOps, Agentic AI and AI Platform Engineering**, designing secure, scalable cloud-native foundations for AI workloads, RAG pipelines and agent-based applications.

Experienced in designing **agent runtime patterns, containerized AI services, Kubernetes platforms, API integrations, Infrastructure-as-Code, GitOps, observability, security and developer self-service capabilities**.

Strong architecture experience across **AKS, Kubernetes, Docker, Terraform, GitHub Actions, Azure DevOps, Argo CD, Helm, Azure OpenAI, OpenAI APIs, HashiCorp Vault, Prometheus, Grafana and OpenTelemetry**.

Working knowledge of **Model Context Protocol (MCP), MCP server architecture, agent tool definitions, agent manifests, runtime configuration and secure agent-to-tool/API integration patterns**, with a focus on creating reusable platform capabilities.

Experienced in building standardized cloud-native platform patterns using **Terraform, Kubernetes, GitOps and policy-as-code**, enabling consistent deployment, security and lifecycle management of enterprise workloads.

Strong understanding of **workload identity, RBAC, secrets management, private connectivity, ingress, API integration, network security, scalability, resilience, observability and FinOps** for production platforms.

Experienced in collaborating with **AI engineering, AI Ops, cybersecurity, architecture, DevOps, SRE and application teams** to translate complex technology requirements into secure, reusable and operationally ready platform solutions.

AWARDS

 Atos Gold Award

 Wipro Star of the Year Award

CORE COMPETENCIES

Agent & AI Platform: Agent Runtime Architecture • Agentic AI • MCP • MCP Servers • Agent Manifests • Tool Definitions • GenAI • LLMops • RAG • Azure OpenAI • OpenAI APIs

Platform Engineering: AKS • Kubernetes • Azure Container Apps • Docker • Helm • GitOps • Argo CD • Platform APIs

EXPERIENCE

AI Platform Lead & Enterprise Architect | GenAI & LLM Infrastructure Architect

HCL Technologies Ltd, India, Mumbai

May 2025 - Now

Architect and lead enterprise-scale **AI-ready multi-cloud platforms across AWS, Azure, GCP and VMware**, providing foundational infrastructure for GenAI, LLM and agentic AI workloads.

Design AI Platform architectures integrating **GenAI, RAG pipelines, LLMops, AIOps and agentic AI capabilities** for enterprise environments.

Define cloud-native platform patterns for **agent workloads, containerized AI services, APIs and Kubernetes-based runtimes**, with emphasis on security, scalability, resilience and operational readiness.

Develop architecture patterns for **agent runtime configuration, tool integration, API connectivity and MCP-oriented integration models**, enabling AI agents to securely consume enterprise capabilities.

Establish reusable **platform engineering and Infrastructure-as-Code patterns** using Terraform, GitOps and policy-as-code to standardize AI workload deployment across environments.

Define governance and security guardrails for AI platforms, including **identity, access control, secrets management, network security, compliance and responsible AI deployment standards**.

Design enterprise observability capabilities using **Prometheus, Grafana, ELK and Splunk**, extended for AI workloads including LLM performance monitoring, anomaly detection and operational telemetry.

Drive **AI platform FinOps**, optimizing GPU/compute utilization, LLM inference costs and cloud infrastructure consumption.

Build and lead a globally distributed AI and cloud engineering organization of **27 architects and engineers**, establishing an AI Platform Center of Excellence.

Partner with CTO/CIO-level stakeholders, cybersecurity, AI engineering, architecture and application teams to define AI platform roadmaps and enterprise architecture standards.

Senior DevOps Architect

Persistent Systems Ltd, India, Mumbai

July 2024 - May 2025

Designed and optimized IaaS/PaaS solutions across **AWS, Azure and VMware**, including EC2, S3, RDS, Azure VMs, App Services and **AKS**.

Designed and operated cloud-native application platforms using **Kubernetes, Docker, Helm and OpenShift**, supporting highly available and scalable workloads.

PERSONAL INFO

- Date of birth: 17 January 1990
- Place of birth: Ratnagiri
- Nationality: India

Automated deployment, scaling and lifecycle management of containerized applications across Kubernetes environments.

Delivered end-to-end CI/CD automation using **Jenkins, GitHub Actions, Azure DevOps, CircleCI and Argo CD**.

Integrated AIOps and observability capabilities using **Prometheus, Grafana, ELK, Azure Monitor, AWS CloudWatch and Datadog**.

Implemented enterprise IAM, RBAC, Azure security controls, AWS GuardDuty, network security and encryption mechanisms.

Applied Infrastructure-as-Code and automation using **Terraform, Bicep, Ansible, Pulumi and scripting**.

Led cloud, Kubernetes, Terraform and security workshops and mentored engineering teams.

Senior Cloud Architect

ATOS Global IT Solutions and Services Private Limited, Spain, Barcelona
[December 2021 - July 2024](#)

Designed enterprise IaaS and PaaS architectures across **Azure and AWS**, including Azure VMs, AKS, App Services, Functions, EC2, S3, RDS, Lambda, Fargate and API Gateway.

Designed and implemented **AKS-based cloud-native platforms** for scalable application workloads.

Implemented Infrastructure-as-Code using **Terraform, Bicep and ARM templates**, establishing repeatable and automated cloud provisioning.

Designed CI/CD and GitOps workflows using **Azure DevOps, Jenkins, GitHub, Bitbucket and Argo CD**.

Automated application build, test and deployment workflows using Jenkins and Groovy.

Developed automation-first delivery models using **GitHub Actions, Jenkins and Azure DevOps**.

Managed hybrid cloud migrations involving **VMware Cloud on AWS and HCX**.

Conducted cloud architecture and DevOps enablement workshops for engineering teams.

Cloud Ops Architect

Accenture Solutions Ltd, Singapore, Singapore
[May 2021 - December 2021](#)

Led design, implementation and maintenance of IaaS and PaaS cloud infrastructure across multiple enterprise environments.

Architected cloud operations frameworks covering monitoring, automation, incident management, scalability and reliability.

Cloud Architect

Wipro Technologists Ltd, Dubai, Dubai
[September 2019 - May 2021](#)

- Designed and implemented scalable, secure cloud-based solutions for clients across multiple industries.

- Led multi-cloud migration projects from concept to production; delivered IaaS and PaaS architectures on AWS and Azure.
 - Earned Wipro Star of the Year Award for outstanding delivery performance and innovation.
-

Senior Vmware Administrator

Wystek Systems Ltd, India, Mumbai

January 2017 - September 2019

- Managed and maintained enterprise virtual infrastructure using VMware vSphere, ensuring high availability, performance, and reliability.
-

Vmware Administrator

CMS IT Services Ltd, India, Mumbai

April 2015 - December 2016

- Administered VMware environments; performed capacity planning, patching, and troubleshooting for enterprise virtualization stack.
-

Wintel Administrator

HCL Infosystems Ltd, India, Mumbai

July 2013 - February 2015

- Managed Windows server infrastructure and provided L2/L3 support for enterprise IT environments.
-

Remote Support Engineer

Capgemini Ltd, India, Mumbai

January 2012 - April 2013

- Provided remote technical support and troubleshooting for enterprise clients across Windows and network environments.
-

EDUCATION

Masters of Computer Science, Deccan College Postgraduate and Research Institute, India, Mumbai

2011 - 2013

The curriculum of an MSc Computer Science program typically covers a wide range of topics in computer science, including algorithms, data structures, computer architecture, operating systems, software engineering, artificial intelligence, machine learning, cybersecurity, databases, and more.

Bachelor of Computer Science, Lords Universal College Of Science, India, Mumbai

2008 - 2011

Bachelor of Computer Science with expertise in software engineering, data structures, algorithms, and computer architecture. Proficient in programming languages such as Python, Java, and C++, with hands-on experience in software development methodologies and best practices. Skilled in problem-solving and logical reasoning, with a strong foundation in mathematics and computational theory. Passionate about leveraging technology to innovate and solve complex challenges in the field of computer science.

COURSES

AWS Developer Associate, Amazon

2026

AWS Practioner Certified, AWS

2021

Microsoft Azure 900 and 104 Associate Certified, Microsoft

2019

Vmware VCP Certified, Vmware

2018

VMware Cloud Foundation - 9.0 Architect, VMware

2025

Harness Certified Continuous Delivery & GitOps Developer, Harness INC

2025
